Highlights	• Motivated and passionate researcher about power systems optimization and economics.
	• Demonstrated ability in conducting original research works and developing novel solution approaches.
	• Work individually or as a part of a multi-disciplinary, remotely-connected team.
	• Active collaboration with researchers of Washington State University, West Virginia University, and Massachusetts Institute of Technology.
Research Interests	• Electric Power & Energy Systems Modeling, Operations & Planning.
	• Applied Power System Economics & Game Theory.
	• Applied Cyber-Physical Power System Optimization.
	• Power System Resiliency.
Education	**2020, Ph.D., Indian Institute of Technology Bombay (IITB), India and University of Wollongong (UOW), Australia (under a Cotutelle/Joint Agreement).**
	Dissertation: *Techno-economic analysis of electricity networks with renewable energy sources and storage devices.*
	Principal Advisors: Dr. S. A. Khaparde, and Dr. A. P. Agalgaonkar
	• *The dissertation has been presented in a panel session at IEEE Power and Energy Society General Meeting, 2019.*
	2020, M.Tech. in Energy Systems Engineering (under M.Tech. + Ph.D. Dual Degree programme), Indian Institute of Technology Bombay, India.
	2012, B.Tech. in Electrical Engineering, Kalyani Govt. Engineering College, West Bengal University of Technology, India.
Research Experience	**April, 2023 - Present, TEES Senior Research Engineer I, Texas A&M University, TX, USA.**
	Research in cyber-physical system security, demand response, electricity markets, distributed optimization, and stochastic power system control considering Distributed Energy Resource (DER) systems. Assist in teaching and training undergraduate research associates, masters, and Ph.D. students to apply electrical engineering fundamentals and facility operations.
	September, 2021 - March, 2023, Engineering Scientist, West Virginia University, WV, USA.
	Contributed to two projects: US DOE UI-ASSIST and NSF CPS aDaption. Research in distributed optimization, resilient operation of the power distribution system, and development of retail electricity markets with Distributed Energy Resource (DER) systems. Mentoring PhD students for distributed algorithm development with discrete variables and test-bed development for distributed applications. Collaborated for machine learning-based power system operational control algorithm development. Contributed to writing proposals as a researcher or a co-I of PSERC, NSF, and US-DOE projects.
	January, 2020 - August, 2021, Post-Doctoral Research Associate, Washington State University, WA, USA.
	Research in distributed optimization and resilient operation of the power distribution system with DERs. Mentoring undergraduate students for test-bed development. Collaborated for machine learning-based power system operational control algorithm development. Contributed to writing proposals for external funding.

July, 2019 - December, 2019, Research Associate, Indian Institute of Technology Bombay, Mumbai, India.
Research in power quality economics.

Reports	[S1] State level smart grids road-map for Maharashtra, India, *Technical Report*.
Doctoral Research	• Sizing and operation of storage devices to mitigate renewable energy variability. • Determining reserve requirement and the allowable delay in a low-inertia system. • Developing efficient policies of procuring voltage sag mitigation devices.
Fellowships and Awards	• Conferred POSOCO Power System Awards (PPSA) under Doctoral category, 2020. • Recommended for the Best Ph.D. Thesis award, IITB, 2020. *One of the selected external examiners stated: "the thesis presents the research carried out by the student in an innovative (way of thinking) manner addressing the problem of low inertia due to renewable energy integration — Application of 'Diverse' Approaches, Conceptually and Mathematically for Problem Solving."* • Recommended for special commendation for an Outstanding Ph.D. Thesis, UOW, 2020. *One of the selected external examiners noted: "the thesis is a solid and addresses a number of topics that have resulted in high quality publications. In addition, he/she highlights the fact the student is able to identify research problems and develop*

innovative solutions.”

- Granted University Postgraduate Award (UPA) and Institute Postgraduate Tuition Award (IPTA) from the University of Wollongong, Australia, 2016-2017.
- Granted TA-ship for M.Tech.+Ph.D. program, Govt. of India, 2012-2018.

Teaching Experience

- Teaching Assistant + Delivered a few lectures in *Smart Grids* course at IITB, Jul.-Dec., 2018.
- Teaching Lab demonstrator, *Power Electronics and Drives,* UOW, Jul.-Nov., 2017.
- Teaching Lab demonstrator, *Power Engineering 1,* UOW, Feb.-Jun., 2017.
- Teaching Assistant, *Energy Management*, IITB, Jan.-May, 2016.
- Assisted in conducting the (4 days) CEP course on *Energy Management* at IITB, Nov., 2015 and Mar., 2015.
- Head Teaching Assistant, *Introduction to Electrical Systems*, IITB, Jul.-Dec. 2014 and Jul.-Dec. 2015.
- Teaching Assistant, *Power Systems*, IITB, Jan.-May 2014 and Jan.-May 2015.
- Teaching Assistant, *Fundamentals of Energy Engineering,* IITB, Jan.-May 2013.

Research Mentoring Experience

- Mentoring two PhD students, Jan. 2022 - Apr. 2023 WVU.
- Supported in mentoring one undergraduate and one postgraduate student, Jan.-Dec. 2021, WSU/WVU.
- Supported in mentoring two undergraduate summer students, May-Aug. 2020, WSU.
- Mentoring one undergraduate student, Feb.-Jun. 2017, UOW Dubai.

Technical Skills

- Proficient in *GAMS* as a mathematical modeling and optimization tool.
- Proficient in *Matlab*, with *Simulink* and *MatPower*, and OpenDSS.
- Basic use of *PSS/E*, PSCAD, RSCAD, EMTP, *Python* and C.
- Languages: Bengali (proficient), English (proficient), German (basic, received training from DAAD) and Hindi (basic).

Services and Associations

- Member, *IEEE, IEEE Power and Energy Society, IEEE Control Systems Society, IEEE Young Professionals* (Membership Number 92396111).
- Member, *The Institute of Engineers (India)* (Membership Number M-1773615).
- Member, *American Economic Association* (Membership Number 000468735).
- Volunteer, *IEEE Power and Energy Society*, Young Professionals Technical Activities Coordination Sub Committee.
- Member, IEEE WG on Modern & Future Distribution System Planning, IEEE PES PSOPE Power System Economics Subcommittee, IEEE TF on Operational Tools for Enabling Resiliency.
- Reviewer, *IEEE Trans. Power Del., IEEE Access, IEEE Trans. Sust. Energy, IEEE Trans. Power Syst., Energies, PESGM 2018.*
- Technical Program Committee member, AIBThings conference.
- Proctor, *IEEE xTreme 2017,* Judge, *14th Annual Summer Undergraduate Research Symposium, WVU, 2022 Spring Undergraduate Research Symposium, WVU, 2022 IEEE PES GM Student Poster Competition, 2023 IEEE PES GM Student Poster Competition, Mentor, 2023 IEEE PES GM.*
- Assisted in conducting (also attended) *Master of Electrical Power Engineering* program at UOW, Apr. 2017.
- Web Administrator at *IEEE UOW student branch*, 2016-2017.
- Co-lead technical sessions group in National Power Electronics Conference (NPEC) held at IIT Bombay, Dec. 2015.

Professional Development	Grant Writing & Management (DWIH Workshop), Strengthen Your Professional Communication Skills (WVU LOD), Creating New Habits with Time Management (WVU LOD), Navigating Mentoring for Undergraduate Research Mentors (WVU Workshop), Promoting Active Learning Online (ACUE microcredential Course).
Relevant Courses or Tutorials	Applied Linear Algebra, Applied Multivariate Statistics in Chemical Engg., Computer-Aided Power System Analysis, Distributed Generation and Microgrids, Energy Systems Modeling and Analysis, Game Theory: I, Games and Information, Microeconomics: When Markets Fail, Numerical Methods and Programming, Optimization and Game Theory: From Basics to the Latest Trends, Restructured Power Systems.
Career Objectives	I am an adaptive, enthusiastic, fast-learning, focused, and ambitious researcher, possessing strong analytical and problem-solving skills, looking to significantly contribute to future power grid operations. I am highly passionate about power systems modeling, optimization, and economics, and seeking every opportunity to improve my skillsets so that I am able to contribute to original and novel algorithm development. I can work individually or as a part of a multi-disciplinary, remotely-connected team. I have collaborated with others in developing test-beds for analyzing distributed algorithm performance (with students at WVU) and developing machine learning approaches for power systems operation (with researchers from the University of Houston and Vanderbilt University). I am also working with Massachusetts Institute of Technology researchers to develop alternative retail electricity markets using various centralized and distributed architectures. I have limited teaching and mentoring experience, and my mentees appreciated my contribution to their research. All these qualities make me believe I can take the next set of challenges for power systems operations while being an all-around researcher.
